PROFESSIONAL SUMMARY

Full Stack Developer with 5+ years of experience building websites, e-commerce, e-learning platforms and internal web applications with PHP, WordPress, WooCommerce, Laravel and Moodle, and on the frontend with Astro, React and the JavaScript library ecosystem. I use AI and agents in my daily work to automate processes and deliver quickly, cleanly and securely. My current focus is cybersecurity, in response to the exploits emerging across different technologies, so I can keep shipping functional, up-to-date applications that solve real business problems.

TECHNICAL SKILLS

Backend: PHP, Laravel, Filament, Livewire, REST APIs, MySQL / MariaDB, Supabase (PostgreSQL)

Frontend: Astro, React, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, SASS, HTML5, CSS3, Bootstrap

CMS & platforms: WordPress (custom themes and plugins), WooCommerce, Elementor Pro, ACF, Moodle, VTEX, Bókun

AI & automation: AI agents, Claude Code, process and workflow automation

Security: cybersecurity best practices, security analysis and site maintenance, Kali Linux

Tools: Git / GitHub, Vite, Vercel, Composer, npm, Microsoft 365 administration, technical SEO

PROFESSIONAL EXPERIENCE

Senior Full Stack Developer
Apr 2026 – Present

Grupo La Sal (La Sal Catering) · Mallorca, Spain

- Develop and maintain the group's four websites (catering, food delivery and leisure bookings) on WordPress and WooCommerce.
- Build internal web applications for invoicing and lead management.
- Integrate booking (Bókun), payment gateways and ERP systems.
- Automate processes with AI and agents as part of the daily workflow.
- Maintain the platforms with a focus on security, performance and technical SEO; administer Microsoft 365.

Senior Full Stack Developer
Feb 2024 – Mar 2026

Gestlife (Panamerican Sales Institute SL) · Barcelona, Spain

- Led a development team building complex PHP web applications on WordPress and Moodle.
- Built custom WordPress and Moodle plugins: cross-platform student data, rankings, course progress and scoring.
- Integrated third-party APIs and payment gateways.
- Carried out cybersecurity analysis of the platforms and introduced development best practices.

Freelance Web Developer
Oct 2023 – Present

Self-employed

- Design, development and maintenance of client websites: updates, security analysis and SEO.

Full Stack Developer & Web Support

May 2021 – Oct 2023

De Barricas Vinoteca (Grupo DB SRL) · Buenos Aires, Argentina

- Built two complete e-commerce sites with PHP, WordPress, WooCommerce and VTEX; project-managed the VTEX store.
- Improved user experience, performance and SEO to drive sales.
- Upgraded reporting and analytics; delivered responsive layouts with the design team.

WordPress Developer & E-learning Manager

Jan 2020 – May 2021

Fundación Brincar por un autismo feliz (non-profit) · Buenos Aires, Argentina

- Built a WordPress and WooCommerce store connected to the foundation's Moodle e-learning platform.
- Developed WordPress themes and managed plugins.
- Configured and customized Moodle, managed courses and supported users.

Earlier experience (2018 – 2020): digital marketing at Ambition (Buenos Aires) and customer service in hospitality (Barcelona).

SELECTED PROJECTS

Marine Logbook (Next.js, TypeScript, Supabase, Leaflet): marine species catalog and snorkeling log with a live sea conditions map and cross-device sync. mallorca-marina.vercel.app

Studio Architect (React, Laravel, Filament): architecture studio website powered by a custom CMS with a public REST API. arquitectura-estudio.vercel.app

Employee intranet (Laravel, Filament, Livewire): timesheets, absences, calendars, departments and a metrics dashboard.

Moodle and WordPress plugins (PHP): student rankings, course progress and a scoring block for teachers. github.com/martinbinotti
